Subject: Documentation of Face-to-Face Meeting – November 2022  
Calaveras Power Station  
San Antonio, Texas

Dear Mr. Malone:

CPS Energy owns and operates the Calaveras Power Station, which includes two power plants (only one plant is currently in operation) that have Coal Combustion Residuals (CCR) units subject to regulation under Title 40, Code of Federal Regulations, Part 257 (40 CFR §257), Subpart D (a.k.a. the CCR Rule). Per 40 CFR §257.73 (a)(3)(i)(E), an annual face-to-face meeting or exercise must be held between representatives of CPS Energy and local emergency responders.

The annual face-to-face meeting or exercise must be held regardless of whether one of the emergency levels has occurred. If an incident defined by one of these emergency levels occurs, then the annual meeting date may be moved to discuss the incident.

This letter documents that the annual face-to-face meeting was conducted on November 7, 2022. This meeting was attended by representatives of CPS Energy, Texas Commission on Environmental Quality (TCEQ), San Antonio River Authority (SARA), Thousand Trails, and US Ecology. This letter must be maintained in the facility's operating record and must be uploaded to the established CCR website.

Environmental Resources Management Southwest, Inc. appreciates the opportunity to work with you on this project. Should you have any questions, please contact us.

Yours sincerely,

Environmental Resources Management Southwest, Inc.

Walter Zverina  
Senior Project Manager
