

June 6, 2024

Dear Valued Customer:

On behalf of CPS Energy, the Substation Engineering project team and I would like to update you on the Midtown Substation Project, which was approved by our Board of Trustees during their October 31, 2021 meeting. This project improves the electric service reliability to homes and businesses in your area.

As you may have noticed, site work construction began back in April 2024. Physical and electrical design continue to progress towards completion. The construction finish date remains as April 2025. Information about the project and previous communications are available at [cpsenergy.com/infrastructure](http://cpsenergy.com/infrastructure) under Substation Projects – Midtown Substation.

For your safety, I respectfully ask the community not to enter the construction site or communicate with our contractors. If you have any questions or concerns, please feel free to reach out to me, and I will address them in a timely manner.

We value you as our customer, and we are working hard every day to serve you and our community. We appreciate your patience, and we will continue to keep you informed as the project progresses into the different phases towards overall completion.

Sincerely,

A handwritten signature in black ink that reads "Basileo D. Rocha III".
