

February 1, 2024

Dear Valued Customer:

On behalf of CPS Energy, the Substation Engineering project team and I would like to update you on the Midtown Substation Project, which was approved by our Board of Trustees during their October 31, 2021, meeting. This project improves the electric service reliability to homes and businesses in your area.

We are pleased to inform you that the transmission line work that was described in the community update letter dated October 24, 2023, was completed as communicated.

As for the Midtown Substation Project schedule, design and engineering continue to progress towards completion. Our contractor has confirmed that they will begin to mobilize and start with site work construction in spring 2024. The construction finish date remains as April 2025. Information about the project and previous communications are available at cpsenergy.com/infrastructure under Substation Projects – Midtown Substation.

For your safety, we respectfully ask the community not to enter the construction site or communicate with our contractors. If you have any questions or concerns, please feel free to reach out to me directly, and I will address them in a timely manner.

We value you as our customer, and we are working hard every day to serve you and our community. We appreciate your patience, and we will continue to keep you informed as the project progresses into the different phases towards overall completion.

Sincerely,

A handwritten signature in black ink that reads "Basileo D. Rocha III".

Basileo D. Rocha III, P.E.
Manager – Substation Engineering
