Re: Braunig to Highland Hills Rebuild Project Phase II

Dear CPS Energy Customer:

Thank you for allowing us to serve your energy needs. We are reaching out to inform you about this upcoming project to enhance our infrastructure and support electric reliability in your neighborhood.

Our contractor, Source Power, will begin replacing transmission line foundations, towers and wires on September 18, 2023. The expected project duration is approximately eight (8) months. We do not anticipate construction-related power outages while the work is being performed.

The enclosed brochure contains a detailed project description, as well as a map that illustrates the route of the existing transmission line. The project should have little or no impact on your property. All of the transmission lines and structures associated with this project, including towers and foundations, are located within our easements or public street right-of-ways.

If you have any questions or concerns about this important project, you may contact me at (830) 249-3887 ext. 625 or by email at LGraves@cpsenergy.com. Information about the Braunig to Highland Hills Transmission Line Rebuild Project is also available at cpsenergy.com/infrastructure.

We appreciate your patience and understanding while we complete this work to better serve you.

Sincerely,

Lou Graves
Project Manager
