

December 8, 2025

Dear Valued Customer:

On behalf of CPS Energy, the Substation Engineering project team and I would like to update you on the Midtown Substation Project, which was approved by our Board of Trustees during their October 31, 2021, meeting. This project improves the electric service reliability to homes and businesses in your area.

Civil construction continues to progress, as was communicated in the previous letter dated May 19, 2025. Underground construction will occur outside the substation on Belknap and is anticipated to begin in January 2026 for a duration of three (3) months. The overall anticipated construction finish date is now May 2027. Information about the project and previous communications are available at cpsenergy.com/infrastructure under Substation Projects – Midtown Substation.

For your safety, I respectfully ask the community not to enter the construction site or communicate with our contractors. If you have any questions or concerns, please feel free to reach out to me, and I will address them in a timely manner.

We value you as our customer, and we are working hard every day to serve you and our community. We appreciate your patience, and we will continue to keep you informed as the project progresses into the different phases towards overall completion.

Sincerely,

A handwritten signature in black ink that reads "Basileo D. Rocha III". The signature is fluid and cursive, with the last name "Rocha" being the most prominent part.

Basileo D. Rocha III, P.E.
