

March 3, 2025

Dear CPS Energy Customer:

On behalf of CPS Energy, the engineering project team and I would like to inform you of an upcoming project involving the Medical Center to Hamilton Wolfe 138kV transmission lines that are crossing your property. The project consists of replacing the energized wire within a 1-mile-long segment of the existing high-voltage transmission lines along Hamilton Wolfe from Floyd Curl Rd to Fredericksburg Rd.

Our contractor, Utility Construction Services, will be replacing the wire. This improvement project is expected to begin on March 17th, 2025, and is expected to be completed by May 9th, 2025. The anticipated working hours during the scheduled work week will be from 7 a.m. - 6 p.m., and occasionally on weekends.

Please be advised that there will be vehicular traffic through the easement as crews transport maintenance equipment in and about each pole location.

If you have any questions or require more detailed information about this important project, you may contact me or the Project Manager, Cody Lansford at (210) 353-2363 or by email clansford@cpsenergy.com. Thank you in advance for your patience and understanding as we work to complete this significant project.

Sincerely,

Antonio Paredes
Project Engineer
