

Attachment 10

Application of the City of San Antonio, Acting By and Through City Public Service Board (CPS Energy) to Amend Its Certificate of Convenience and Necessity for the Proposed Ranchtown to Talley Road 138 kV Transmission Line Project in Bexar and Medina Counties, Texas

PUBLIC UTILITY COMMISSION OF TEXAS (PUC) DOCKET NO. 57206

The City of San Antonio, acting by and through City Public Service Board (CPS Energy) is providing this notice of intent to amend its Certificate of Convenience and Necessity (CCN) to construct the proposed Ranchtown to Talley Road 138 kV Transmission Line Project in Bexar and Medina Counties.

The proposed transmission line will connect the existing Ranchtown Substation in Northwest Bexar County to the existing Talley Road Substation in Northeast Medina County. The entire project will be approximately 12.11 miles in length and is estimated to cost approximately \$19,048,000.

Persons with questions about the transmission line may contact CPS Energy at 210-353-6673. The CCN application, including detailed routing maps illustrating the proposed transmission line project and project area, may be reviewed on the project website at <https://www.cpsenergy.com/en/about-us/new-infrastructure/Ranchtown-to-Talley-Road.html> and at:

- CPS Energy, 500 McCullough, San Antonio, Texas 78215
- Helotes City Hall, 12951 Bandera Rd, Helotes, Texas 78023

All routes and route segments included in this notice are available for selection and approval by the Public Utility Commission of Texas.

Persons who are affected by the proposed transmission line and wish to intervene in the docket or comment on the applicant's application should do so by filing electronically and you will be required to serve the request on other parties by email. Therefore, please include your own email address on the intervention form. Instructions for electronic filing via the "PUC Filer" on the Commission's website can be found here: <https://interchange.puc.texas.gov/filer> Instructions for using the PUC Filer are available at https://ftp.puc.texas.gov/public/puct-info/industry/filings/E-Filing_Instructions.pdf. Once you obtain a tracking sheet associated with your filing from the PUC Filer, you may email the tracking sheet and the document you wish to file to: centralrecords@puc.texas.gov. For assistance with your electronic filing, please contact the Commission's Help Desk at (512) 936-7100 or helpdesk@puc.texas.gov. You can review materials filed in this docket on the PUC Interchange at: <http://interchange.puc.texas.gov/>.

While the preferred method is for you to submit your request for intervention electronically, if you are unable to do so you may mail 10 copies of the request to:

Public Utility Commission of Texas
Central Records
Attn: Filing Clerk
1701 N. Congress Ave.
P.O. Box 13326
Austin, Texas 78711-3326

The only way to fully participate in the PUC's decision on where to locate the transmission line is to intervene in the docket. It is important for an affected person to intervene because the utility is not obligated to keep affected persons informed of the PUC's proceedings and cannot predict which route may or may not be approved by the PUC.

The deadline for intervention in the docket is December 02, 2024, and the PUC should receive a filing from anyone requesting intervention by that date.

The PUC has a brochure titled "Guide for Landowners Affected by a New Electric Transmission Line Route." Copies of the brochure are available from CPS Energy at 210-353-6673 or may be downloaded from the PUC's website at www.puc.state.tx.us. To obtain additional information about this docket, you may contact the PUC's Customer Assistance Hotline at (512) 936-7120 or (888) 782-8477. Hearing-and speech-impaired individuals with text telephones (TTY) may contact the PUC's Customer Assistance Hotline at (512) 936-7136 or toll free at (800) 735-2989.

In addition to the intervention deadline, other important deadlines may already exist that affect your participation in this docket. You should review the orders and other filings already made in the docket.

Project Segment Descriptions

City Public Service Board (CPS Energy) has filed a Certificate of Convenience and Necessity (CCN) application with the Public Utility Commission of Texas (PUC) to construct a new 138 kV Transmission Line Project in Bexar and Medina Counties. The proposed project route, composed of one segment, begins at the existing Ranchtown Substation, located south of State Highway (SH) 16 (Bandera Road), approximately 0.25-miles east of Shadow Canyon Drive in Bexar County, Texas. The portions of this segment, beginning at the Ranchtown Substation, are as follows:

1. The segment, being co-located along the Ranchtown to Menger Creek 138 kV Transmission Line, exits the west side of the Ranchtown Substation and proceeds west paralleling the north side of the existing Helotes to Ranchtown 138 kV Transmission Line for approximately 0.12-mile crossing Los Reyes Creek (Inset 1).
2. The segment then angles northwest for approximately 0.08-mile crossing SH 16 (Bandera Road).
3. The segment then angles north for approximately 1.12 miles crossing Los Reyes Creek twice. Portions of this segment are also parallel to Los Reyes Creek.
4. The segment then angles west for approximately 0.65-mile. From this angle, the proposed project route leaves its co-location with the Ranchtown to Menger Creek 138 kV Transmission Line and begins its co-location with the existing Cagnon to Kendall 345 kV Transmission Line for the remainder of the route to the Talley Road Substation.
5. The segment then angles south for approximately 0.54-mile.
6. The segment then angles southwest for approximately 0.78-mile crossing a private road.
7. The segment then angles west for approximately 1.25 mile and a portion of this segment parallels the north side of SH 16 (Bandera Road).
8. The segment then angles southwest for approximately 0.05-mile crossing SH 16 (Bandera Road) (Inset 2).
9. The segment then angles west-southwest paralleling the south side of SH 16 (Bandera Road) for approximately 0.22-mile crossing to the west side of SH 211.
10. The segment then angles south-southeast paralleling the west side of SH 211 for approximately 1.34 mile.
11. The segment then parallels the west side of SH 211 from southwest to south for approximately 5.91 miles crossing a natural gas pipeline and San Geronimo Creek twice.
12. The segment then angles west for approximately 0.05-mile where it terminates at the existing Talley Road Substation, located northwest of the Farm-to-Market Road (FM) 471 and SH 211 intersection in Medina County, Texas (Inset 3).
